

I think all air tours should be banned from national parks. The noise, danger and pollution of these tours is well known. the noise in our national parks is intolerable from these tours. their profit making potential has them operating far too frequently and more and more frequently as time goes on. In addition the pollution from the gas is also intolerable and hurts the park itself. It damage sthe air/water and soil in the park. the danger from the pilots and equipment is also a reality. Wehave had numerous crashes in our parks of these air tour operators in various places. There is no effective system in place to monitor to see if pilots are drunk or on drugs and the equipment can also be maintained by the cheapest possible supplier. All in all, we can do without these in our national parks and in the badlands.
